“In a complex world, it gets difficult to manage your day to day to do list or tasks, notes and calendar, and let’s not even get into emails.”

– WEC 2018 Programming Challenge

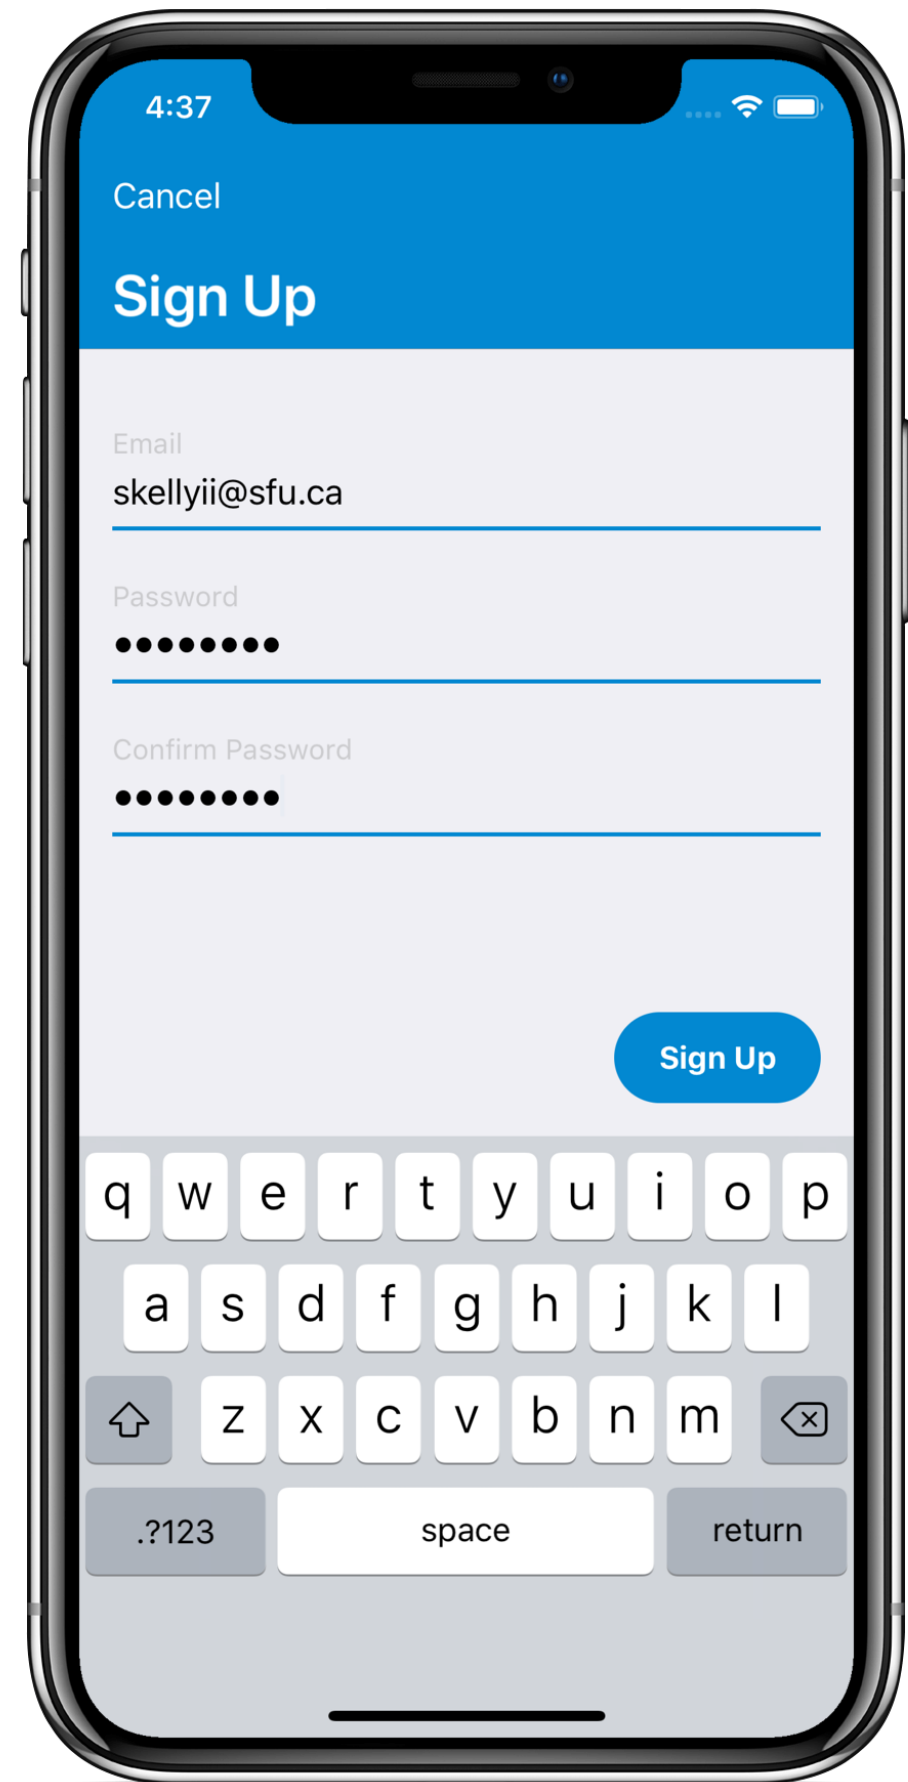

Our Solution

- An elegant, easy-to-use iPhone app called Get My Life Together
- Added focus on group planning or personal management

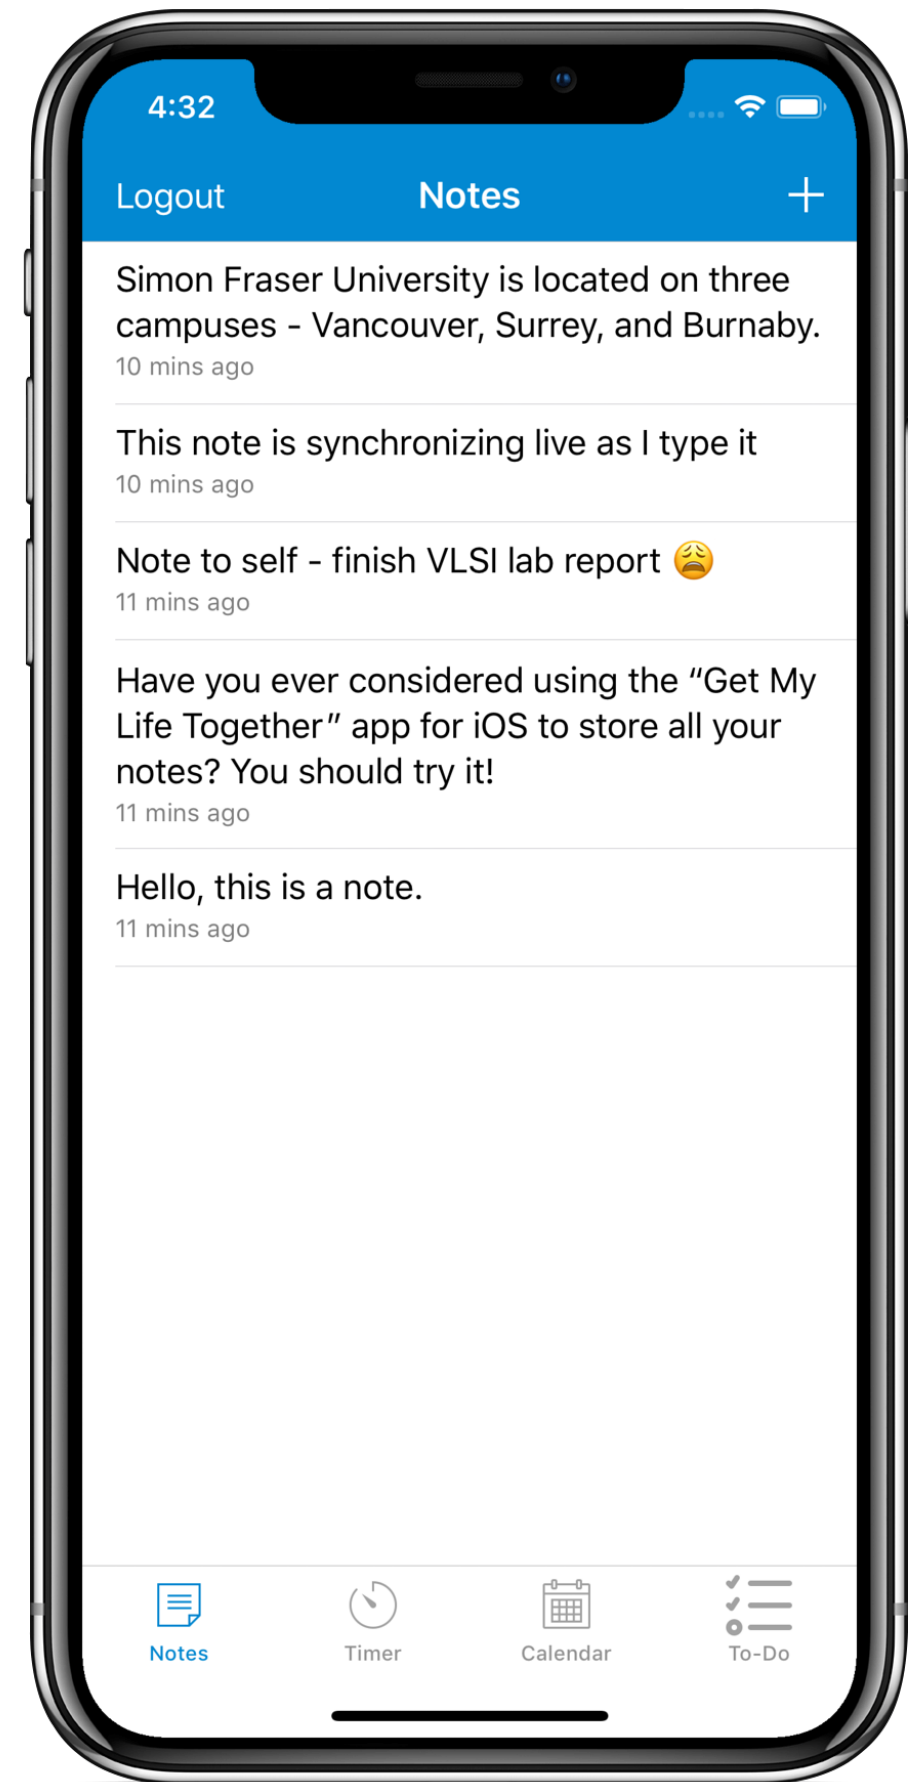

Base Features

- Notes
- To-Do List
- Calendar
- Clock / Timer
- Extra fun features!

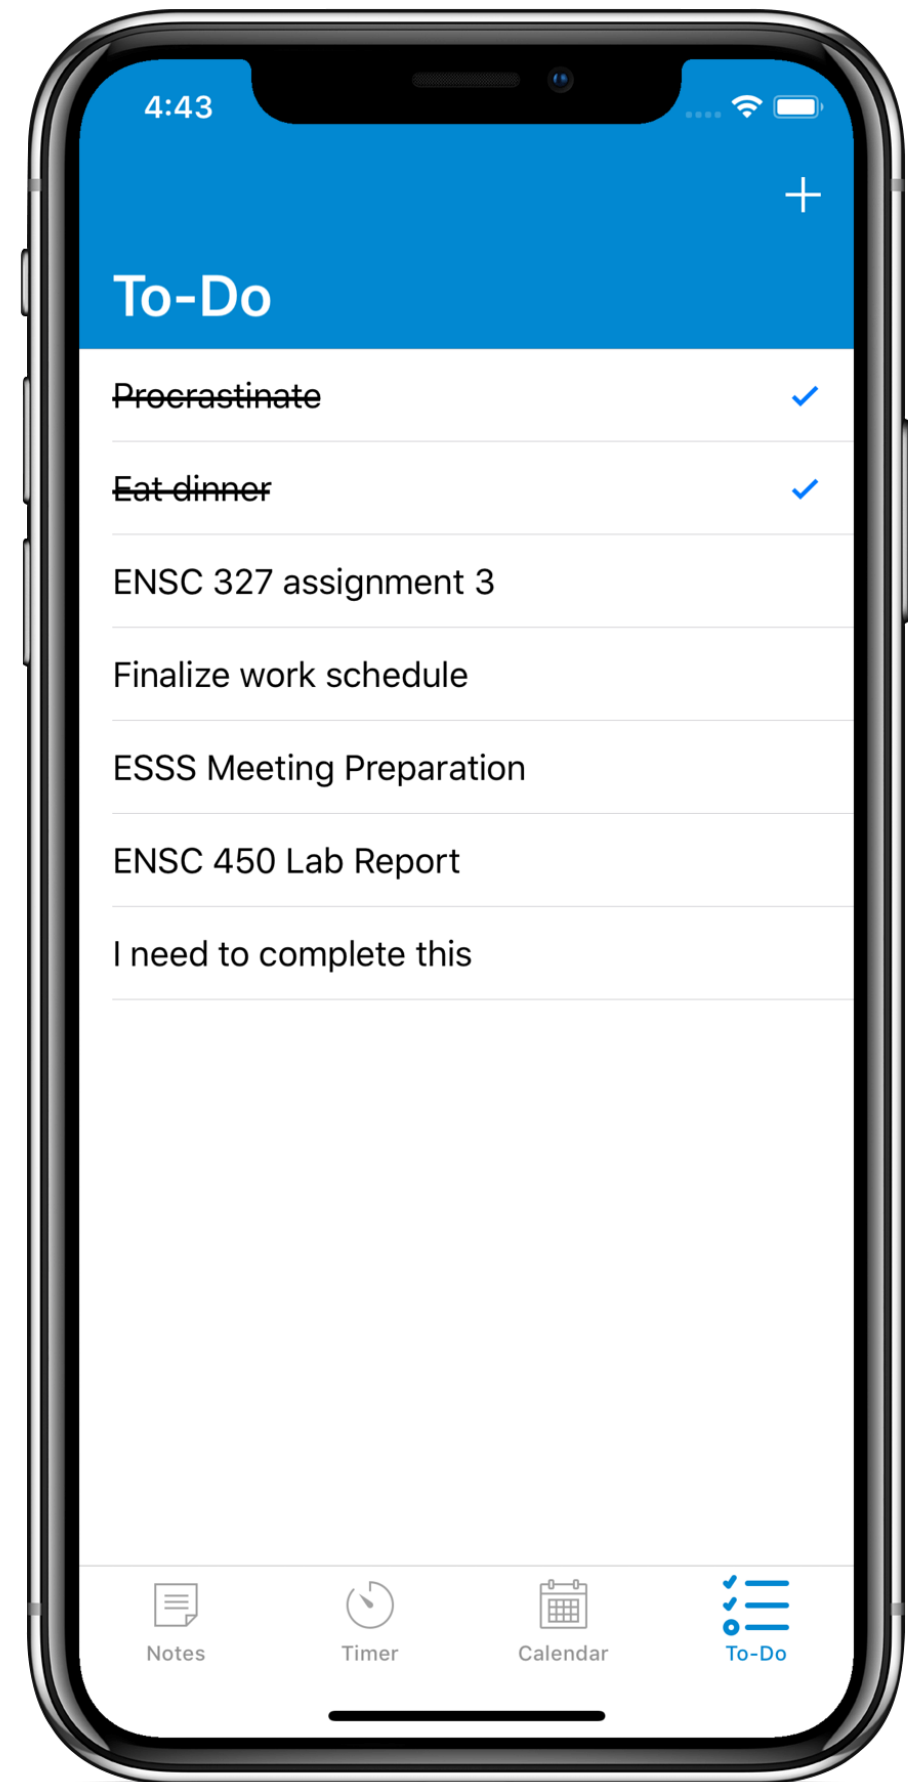

Notes

- Add new notes
- Edit notes
- Swipe to delete

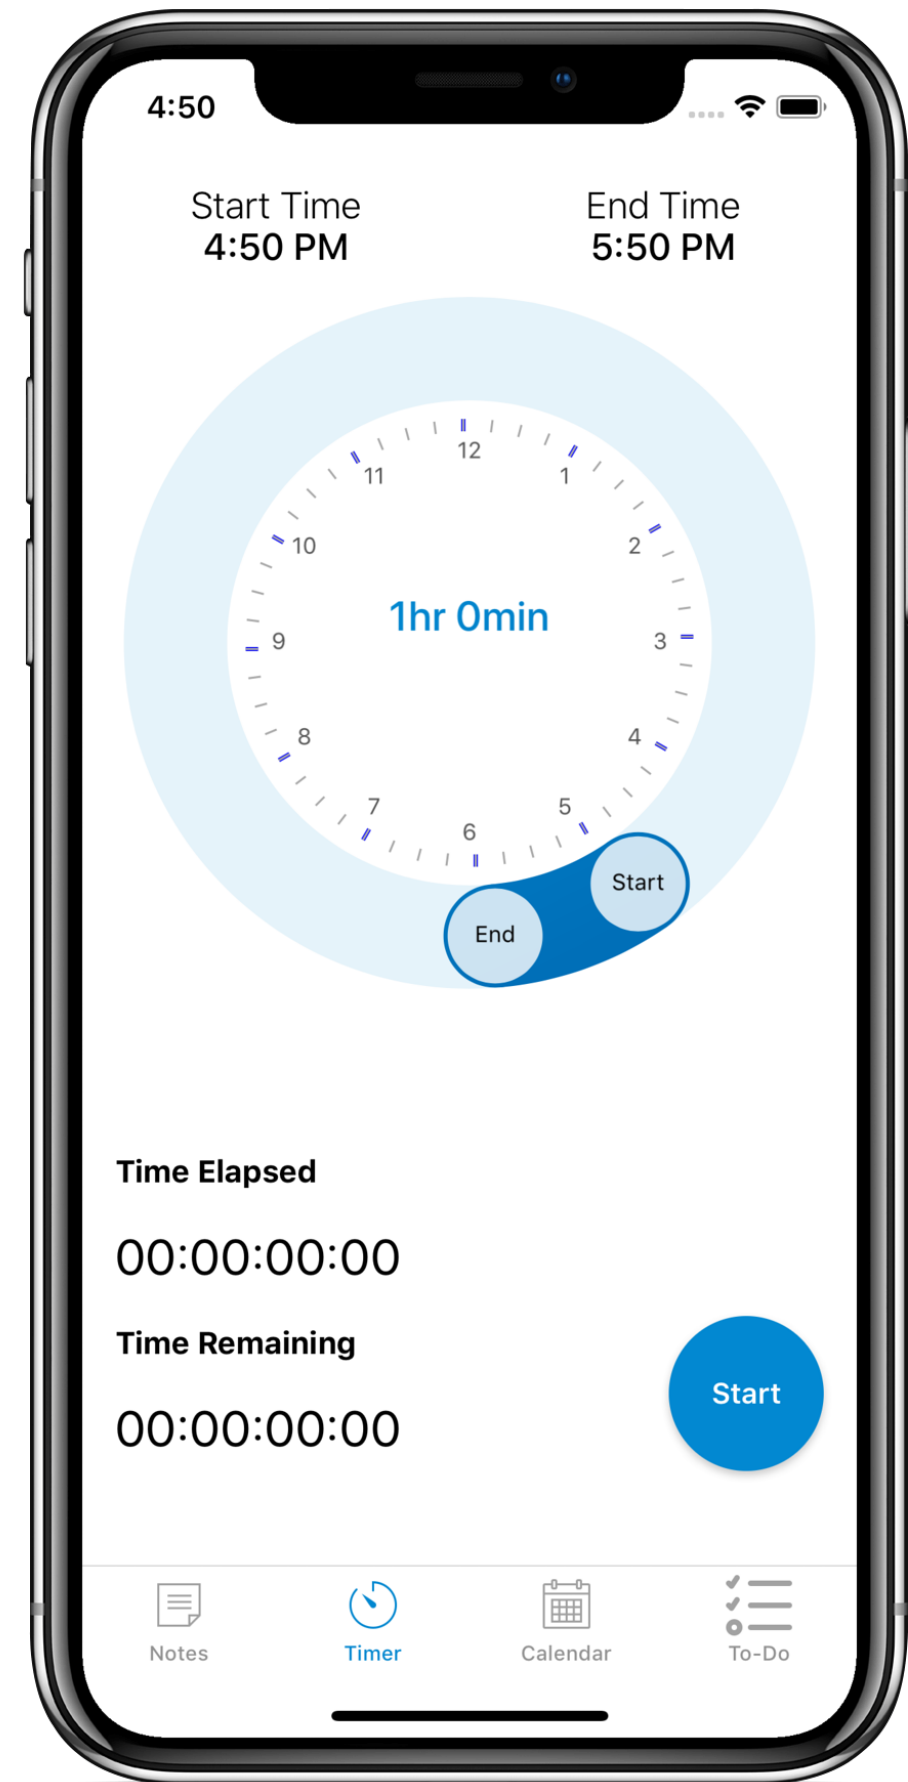

To-Do List

- Add new tasks
- Edit tasks
- Swipe to delete
- Calendar integration
- Intuitive

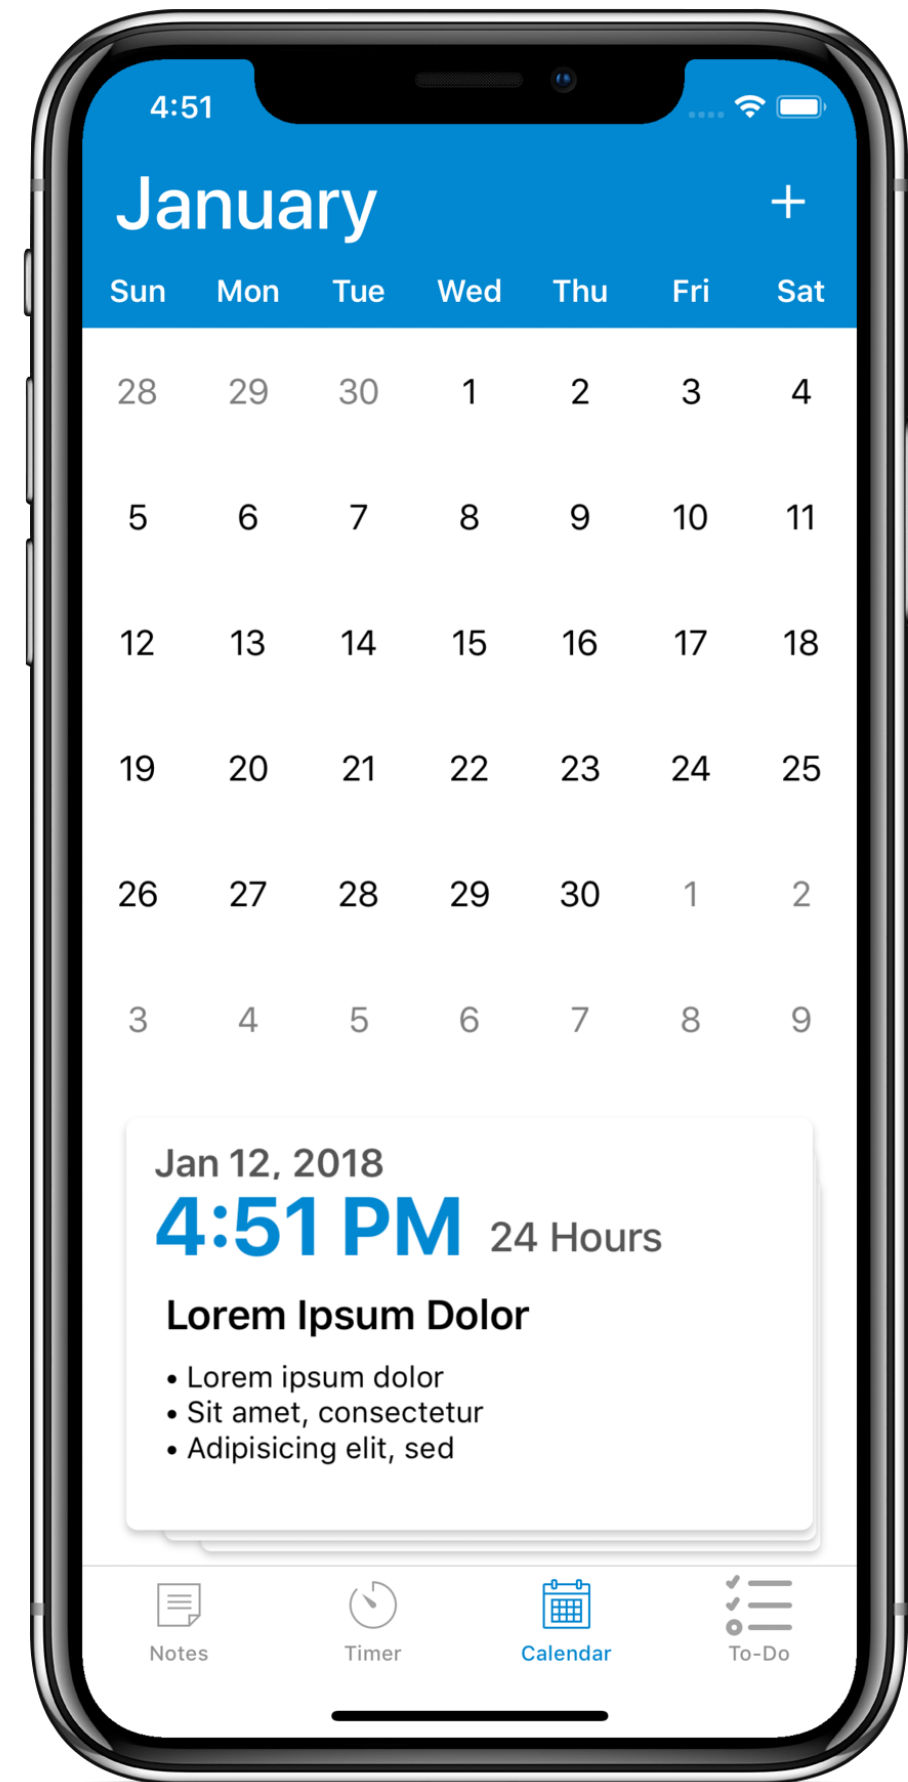

Clock / Timer

- Intuitive dial interface
- Custom length timer
- Pause or end timer

Calendar

- Monthly calendar
- View daily events
- Card user interface
- Add and edit events
- Add tasks to events

Live Demo

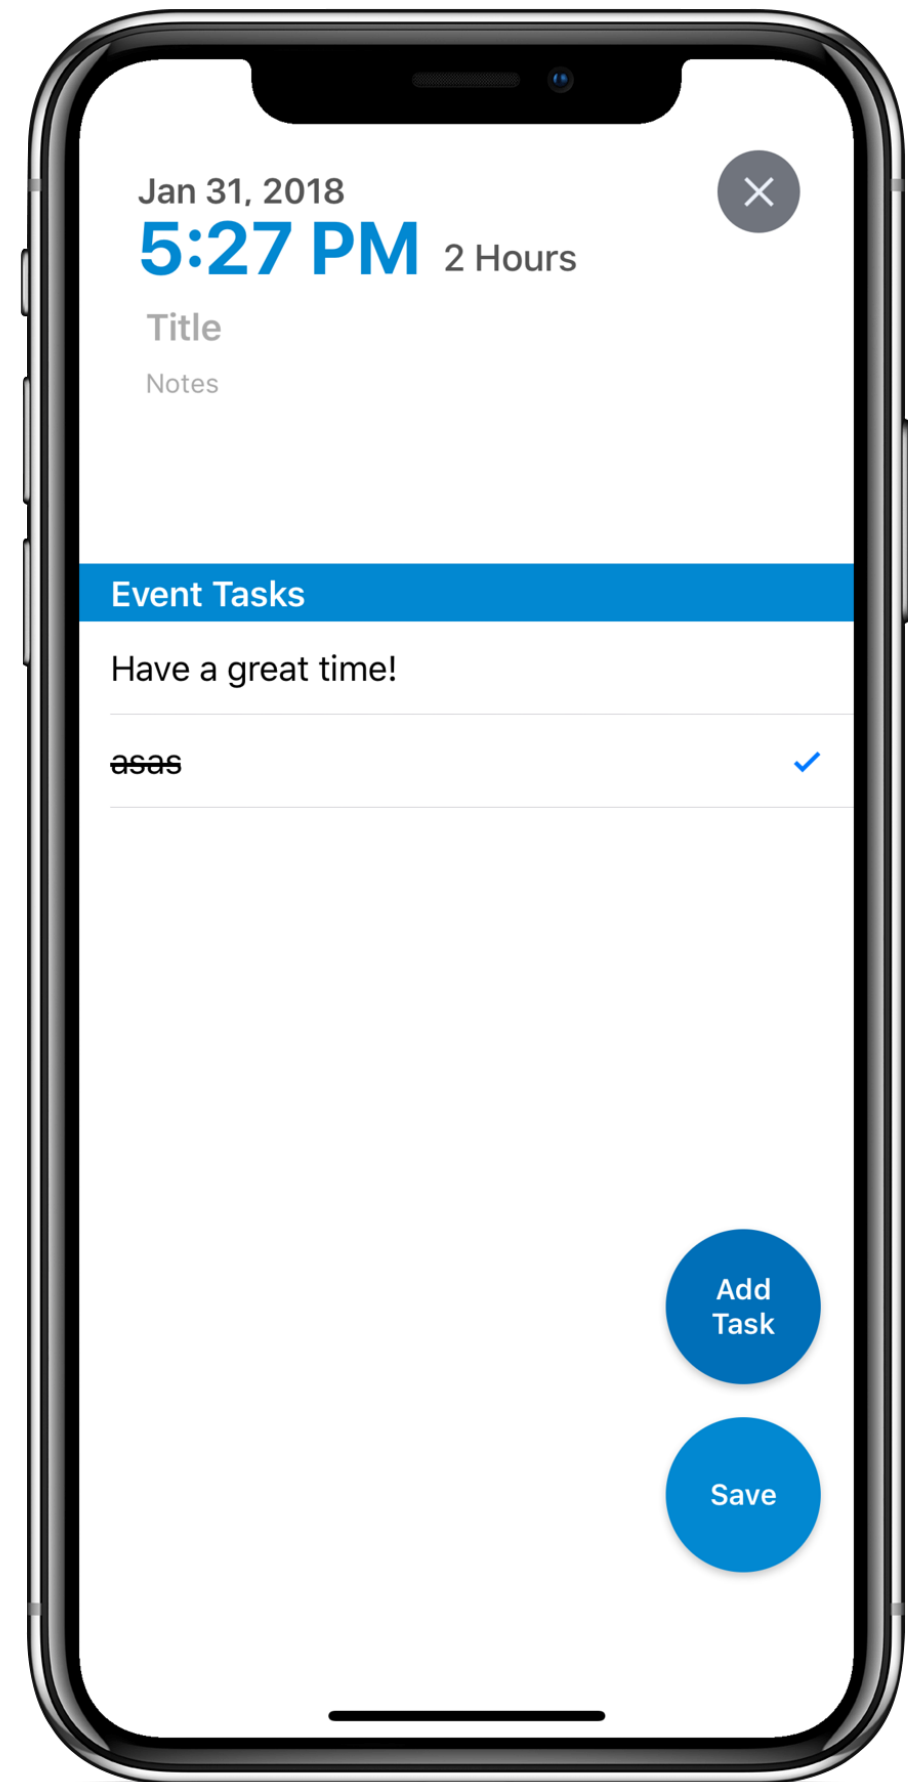

Fun Features!

- Account and multi-device support
- Live synchronization (easily extensible to other platforms)
- Easy-to-use biometric security (Touch ID and Face ID)

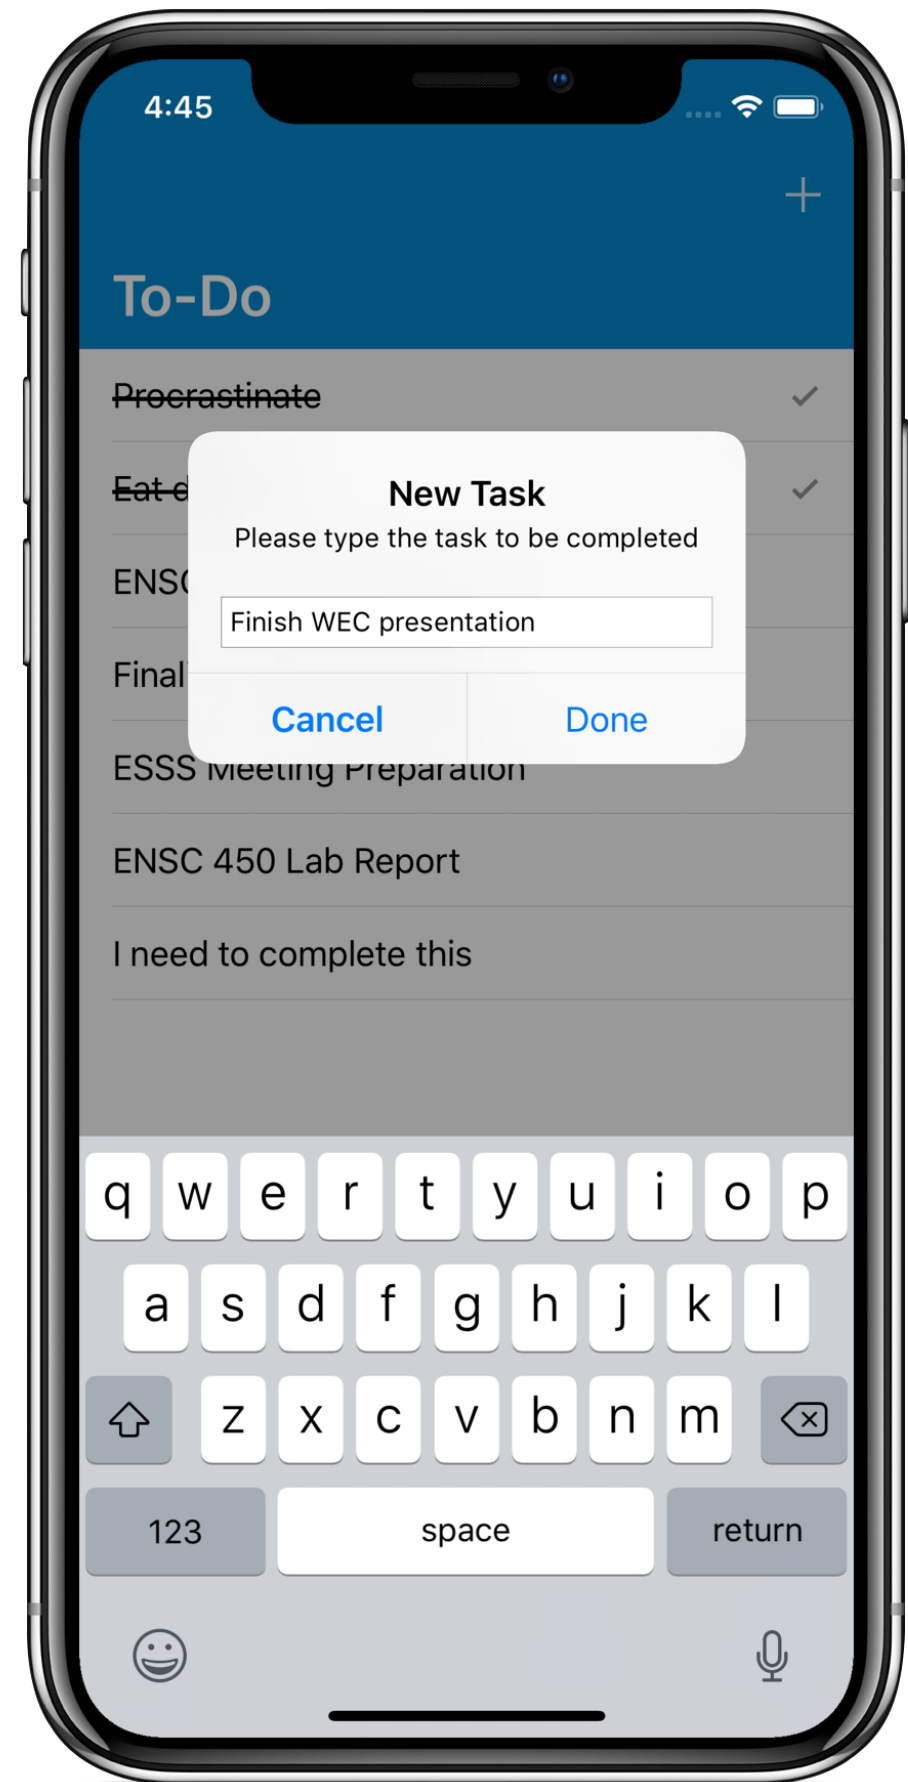

Technical Implementation

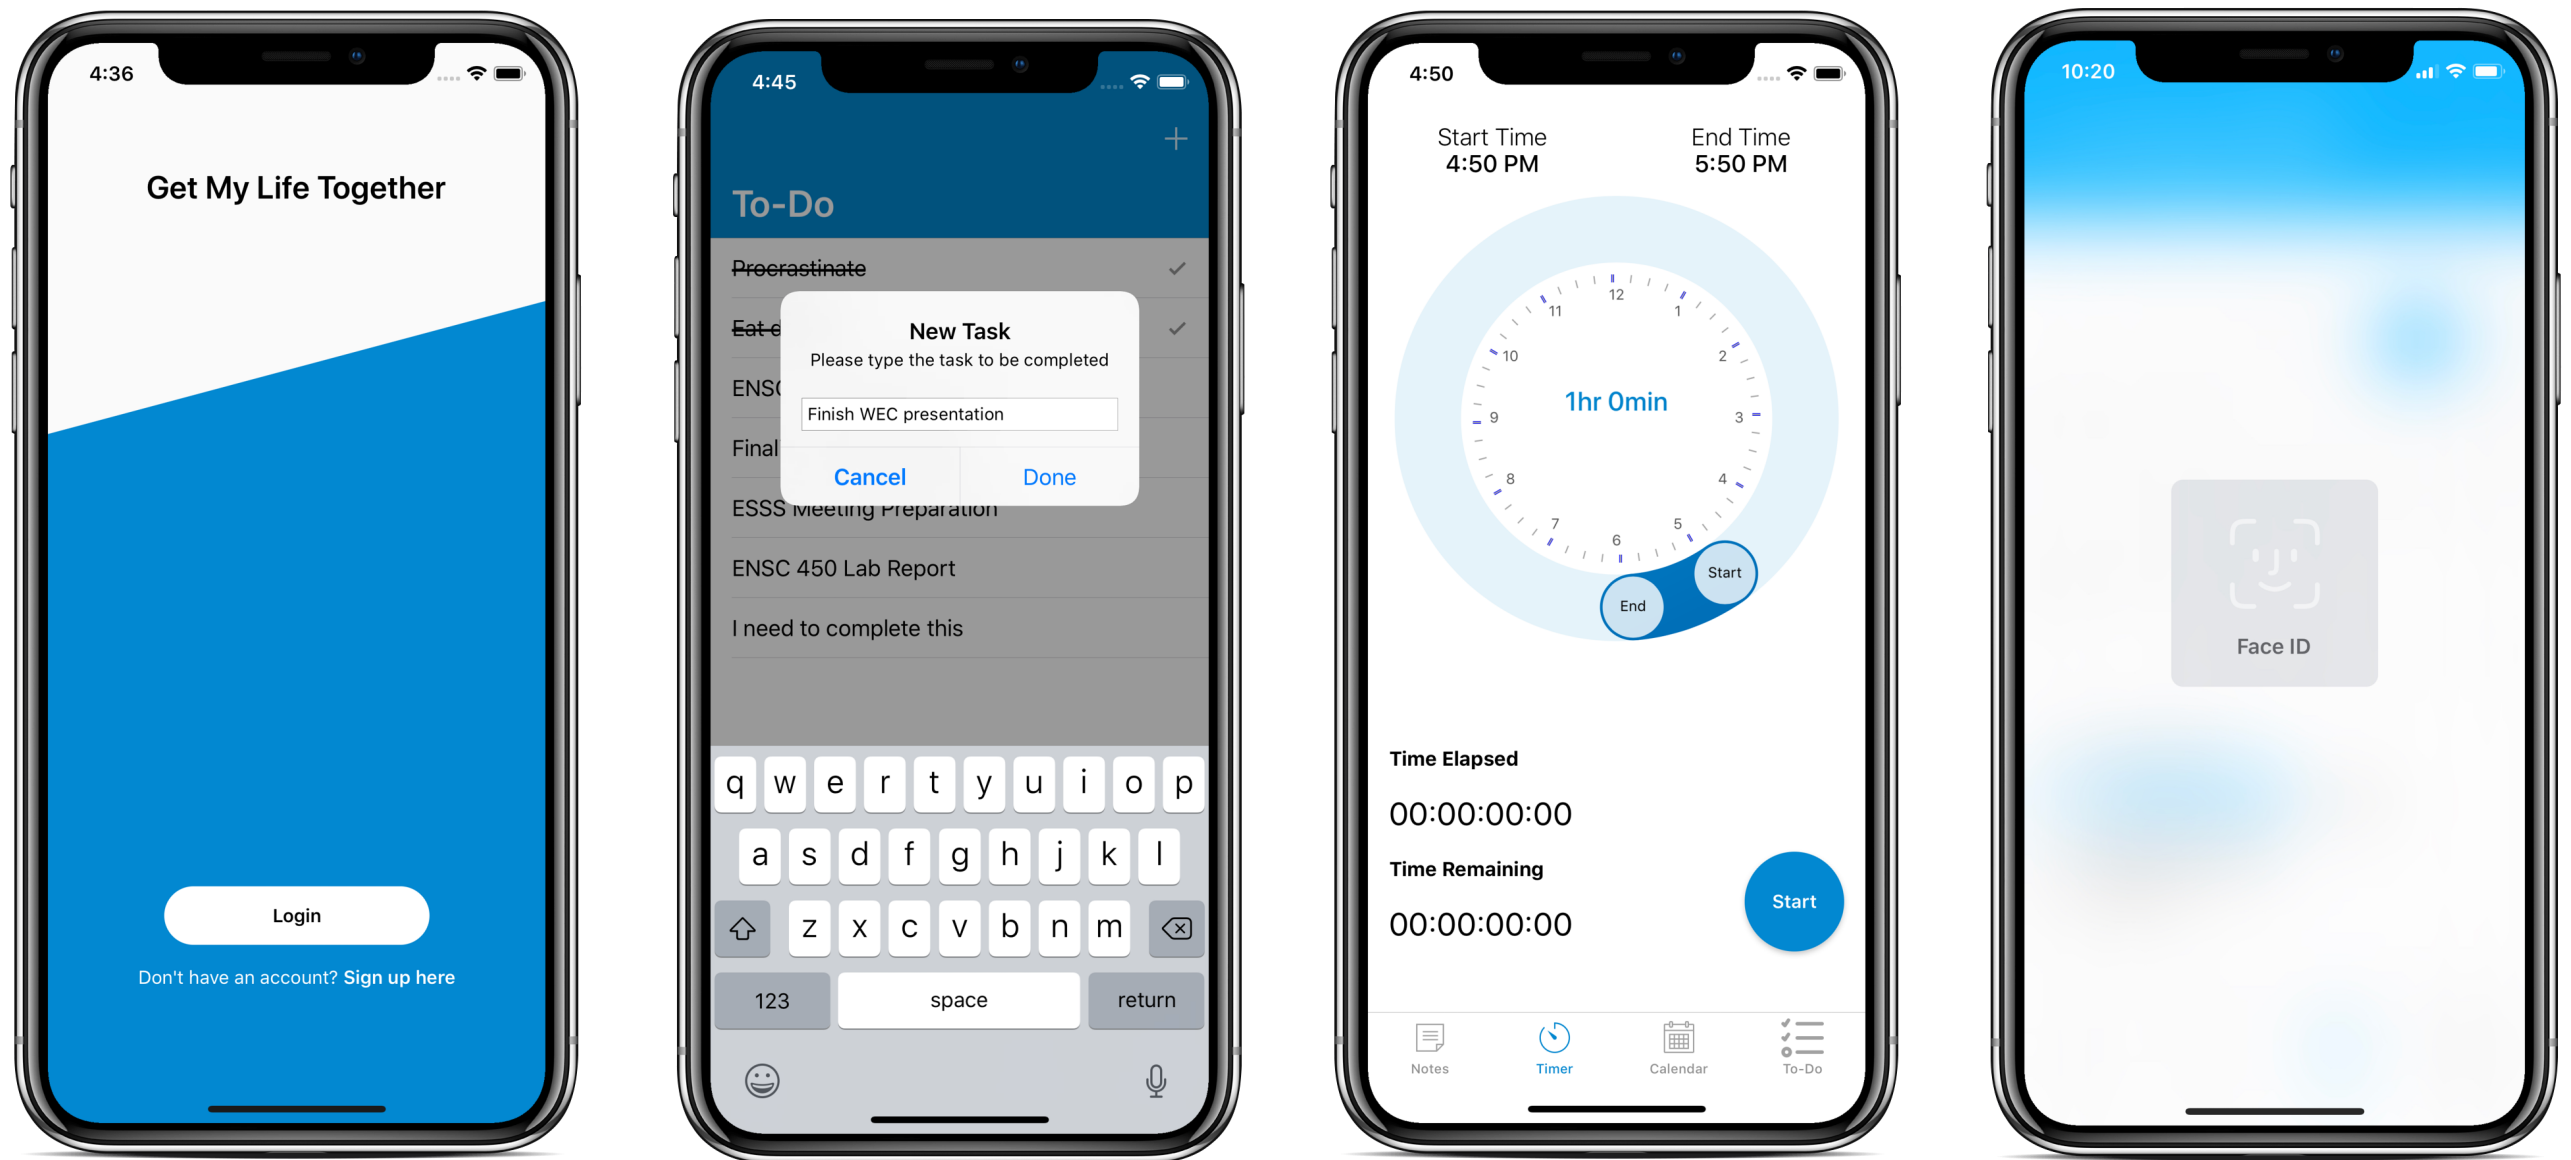

- Native iOS app developed in Swift
- Scalable MongoDB REST API
- Live socket connections between devices and server
- Native integration with device security features

Quality Assurance

- Exploratory testing of all features
- Stress testing (on the app and ourselves)

Thank you! Questions?
